

SCREW PLIER < ZA185 >

Damaged Head

Special Screw Thread

- *Specially Designed To Grip and Remove the Damaged Screws* -

Rusted & Small Screw Head

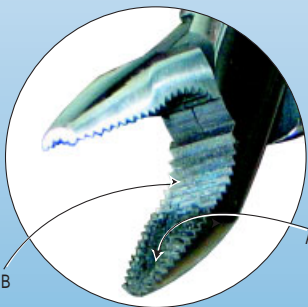

Made in Japan

Powerful Grabbing Force !

Excellent Durability and New Construction

How to Grip on the screw head with ZA185

Small-Sized Screw Head

Medium-Sized Screw Head

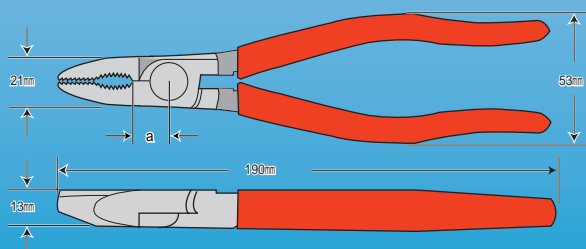

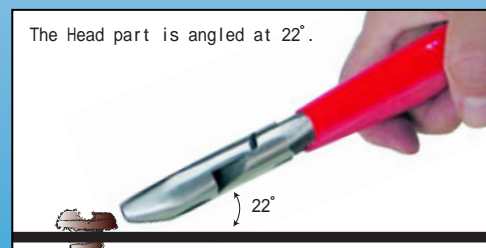

Large-Sized Screw Head

Special Serrated Construction

Our own developed design achieved the special serrated construction of no slipping and no sliding when grasping any screws.

- A. Nose part firmly grips on the small-sized screw head.
- B. Grip part securely grips on the medium and large-sized screw head.

Improving Work Efficiency !

- * The following application may not be usable. □
- The screws coated with special adhesives. □
- The screws head is completely crashed or deformed. □
- High hardened screws etc.,
