

NEW Super Stone Mini Series

NEW Super Stone Mini Series are the polishing abrasive stone specially developed for ultra-fine work. It is suitable for fine lapping of various molds and dies, and it is different from the conventional oil grindstones and other abrasive stones and it has excellent strength and elasticity in spite of its small size, which helps to improve the efficiency of polishing work.

Excellent performance for polishing work in the small, very confined, narrow and concave area.

Super Diamond Stone

- Super Diamond Stones cut and polish in all directions making them perfect for polishing ribs, hard-to reach slots and sidewalls.
- Super Diamond Stones are excellent for polishing carbide and hardened surface.
- Super Diamond Stones are a combination of ceramic fibers and evenly distributed diamond particles imparting a continuous cutting action.
- Super Diamond Stones can be used either by hand, ultrasonic polishers or dipfiles.

Besdia® Ceramic Fiber Stones

BESDIA® Ceramic Fiber Stones are the Taiwan-made ceramic abrasive stones manufactured with Japanese base material by using the Japanese machines and technology.

Advantages :

- High durability and high elasticity
- Better tensile strength
- Excellent Polishing efficiency
- High cost performance
